

AGNES Vitals Connect™

Saves Time and Improves Accuracy

AGNES Vitals Connect™ addresses the #1 challenge reported by 54% of skilled nursing facilities – staffing resources. The AGNES Vitals Connect™ platform automates and streamlines the capture, collection and documentation of gathering your patients' vitals.

- Reduces total time of capture to document from 5 minutes to 2 minutes/patient
- Provides staff more time to spend on direct patient care.
- Ensures accurate and timely patient vital information.

Efficient Collection and Documentation of Vitals at Bedside

AGNES Vitals Connect™ reduces time/resources needed for your staff to take and document patients' vitals. This automated solution allows on-site clinicians to move from room-to-room in just minutes, quickly accomplishing their vitals rounds, and leaving more time for clinical observation and focused patient interaction.

EHR Connectivity Ensures Quality of Data Captured

Take, capture and record vitals in less than 2 minutes! Vitals can easily be captured and collected at bedside using a single user login, and then automatically transferred to PointClickCare®. Direct integration into your EHR eliminates errors that commonly occur with handwritten transcription of vitals.

Scalable to Telehealth Applications

The AGNES Vitals Connect™ is scalable to meet your basic virtual visit needs. Additional telehealth capabilities can be added, such as video conferencing and integrating more medical devices.

All-Inclusive Solution for SNFs:

We want to make it easy for you to get started. AGNES Vitals Connect™ comes equipped with the hardware, software, PointClickCare® integration, connected medical devices, support/maintenance contract and training.
